

**Complete Enterprise
Solutions That Fit!™**

Complete E-Business applications, middleware and technology stack sales, implementation, application and technical consulting, upgrades, training, and support

JD Edwards is still a viable business solution!

"First, PeopleSoft acquired JD Edwards, next Oracle acquired PeopleSoft. These dancing elephants make me worry if my business would continue to receive the software support and upgrades we needed."

AMX understands your concerns. Your IT infrastructure is stretched. And you need to focus on your business not getting smashed by awkward elephants. Depend on AMX to absorb your IT concerns. AMX is a certified Oracle Partner. AMX provides Oracle ERP, CIS, and technical solutions and services all under the Oracle umbrella.

Oracle E-Business Suite - Oracles' comprehensive suite of business applications includes everything from contracts, to supply chain execution to transportation management. AMX understands these applications and your business. We can accurately diagnose your needs and capacity and recommend the right applications for you.

JD Edwards EnterpriseOne - Need a complete suite of modular business applications. AMX advice? Upgrade to the latest version of JD Edwards, EnterpriseOne. Oracle promises: "Our plan is to continue increasing the value of EnterpriseOne with future enhancements and comprehensive product support." Oracle is behind the product and the increased functionality will bring strong Return on Investment (ROI) to your franchise.

JD Edwards World - A comprehensive and low maintenance solution for small business and service organizations. AMX can analyze, troubleshoot and maintain your enterprise system. We are skilled in working with World. In fact last year our consultants provided over 140,000 hours of support to our customers. Additionally, our clients benefit from remote work solutions, allowing consultants to service clients anywhere in the world via dial-in access. By using our successful remote work solutions, we can save you a significant amount in travel related expenses!

Oracle Fusion Middleware - complete software products that coordinate the activity between operating systems and your applications. AMX understands web servers, application servers and content management servers. We can analyze your system, your needs and your capacity. We can pinpoint under used capability and help you maximize your investment.

Our customers report:

"AMX accomplished more than we expected of them. From a project management standpoint, AMX consultants are experts in managing the technical aspects of implementing a new management system."

About AMX International

Founded in 1989, AMX International is a leading software and services provider of Complete Enterprise ERP and CIS Solutions That Fit for Oracle and JD Edwards customers worldwide. Over 500 customers have turned to AMX for the company's complete solutions that integrate the industry's best vendor applications with highly cost effective project management, implementation consulting services, systems integration expertise, on-shore development, and complementary software products.

The Company is known for its superior systems integration of Oracle ERP and CIS applications, AMX Utiligy™ - a pioneering web-services (SOA) next generation CIS, Billing and Customer Care solution for the utilities industry, AMX IQ™ - a 100% pure internet architecture business intelligence (BI), analytics and ad-hoc reporting solution, AMX PolicyPro™ - a 100% web-based collaborative policy and procedure management solution, AMX PayPoint™ - an integrated cashing and point-of-sale application, and AMX eBill ePay™ - a comprehensive web-based billing and payment portal.

Headquartered in Idaho Falls, Idaho, AMX International operates two development, training and customer care centers in Salt Lake City, Utah and Rexburg, Idaho.

For additional information about AMX International, call 1-877-399-7004, visit the company's web site at www.amxinc.com or e-mail at amxinfo@amxinc.com.

"We are explicitly saying that all these products will move forward in parallel and we are publicly committing to future releases as a core part of our strategy. Customers can choose which product fits their needs but we'll have products for every market segment by industry and geography. Having multiple products is a strength. There won't be any forced upgrades across product lines. Customers can stay on the product of their choice and receive new functionality and tech stack improvements."

— Charles Phillips
President
Oracle Corporation
